

TFON Leveltech® TF-L 9011

Leveling & Stress Relief Machines

Heavy-duty leveling capacity in a narrower frame is what the TFON Leveltech® TF-L 9011 is built for. It levels plate and cut parts from 1 to 30 mm thick and up to 1100 mm wide, with a minimum part length of 160 mm and a servo-hydraulic, PC-controlled leveling gap. It suits work dominated by thick parts that are not particularly wide. Total weight: 33,000 kg.

Which job does this machine solve?

- Corrects distortion from cutting and heat input in plate and cut parts from 1 to 30 mm thick by mechanical roller leveling.
- 1100 mm working width: a frame sized for work dominated by narrower parts.
- The leveling gap is set servo-hydraulically and controlled via PC.
- 160 mm minimum part length: short cut parts can be leveled as well.
- Mechanical leveling is kept separate from thermal stress-relief heat treatment; if your drawing specifies a heat treatment, it is planned as a separate process.

Technical Specifications

Material Thickness (mm)	1-30
Minimum Material Length (mm)	160
Quick Changeover for Cylinders	Optional
Leveling Gap Adjustment	Servo Hydraulic / PC Control
Screen	Touch Screen
Maximum Material Width (mm)	1100
Machine Size (WxLxH)	2350x2450x4560
Total Weight (kg)	33000
